

Heatmap showing the performance of 16 fusion methods across 10 datasets. The methods are listed on the right: TrnFusion-DC, TrnFusion-C, TrnFusion-D, TopNet-Fusion, FUSIONCAT-DIER_v1.10_June12019, MapSplice, PRADA, ChromaScan, ARIBA_hc, STRICHIP_csm10_pGen2_May12019, EndScope, FusionHunter, JAFFA-Assembly, ChaiPipe, Infusion, dAFuse, STM_FUSION_v1.5, SOAP-fuse, STMSEQR, rFuse, ARIBA, and PZZLY. The datasets are numbered 1 to 10 on the left. The color scale ranges from black (low performance) to yellow (high performance).
